Underfloor heating:

Information according to Art. 33 of Regulation (EC) 1907/2006 (REACH)

Dear customer,

Vasco Group NV manufactures a large number of products which are "articles" within the meaning of Regulation (EC) 1907/2006 (REACH). We are therefore subjected to the information obligations for these products in accordance with Article 33 of the Regulation if a product supplied by us contains a substance of very high concern (SVHC substance) in a mass concentration of more than 0.1 per cent by mass.

The list of SVHC substances currently comprises 240 different substances and is published on the website of the European Chemicals Agency (ECHA) at <https://echa.europa.eu/candidate-list-table>.

In order to fulfil our information obligations as a manufacturer, we are in contact with our suppliers from both the EU and non-EU sectors and regularly obtain binding information as to whether listed SVHC substances are contained in the raw materials and components supplied at more than 0.1 percent by mass.

Based on the current state of knowledge, we hereby inform you that the underfloor heating components do not contain any SVHC substances in a mass concentration of more than 0.1 per cent by mass.

If you have any further questions about the implementation of the REACH regulation in our company, please do not hesitate to contact us at any time.

Yours sincerely

Vasco Group NV
Peter Ketelslegers
Director
