

EASYFLOW PLENUM VERTICAL

DESCRIPTION

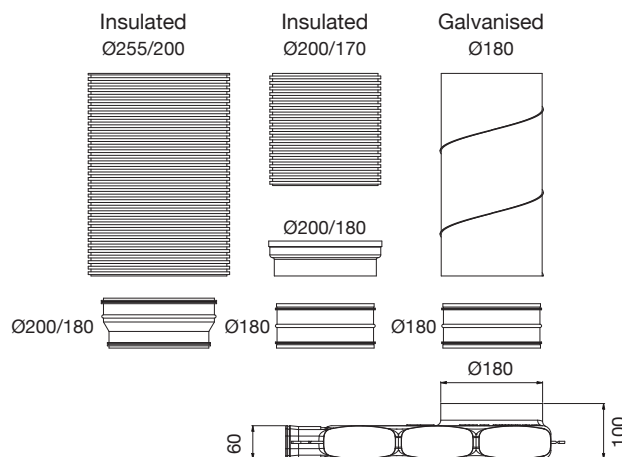

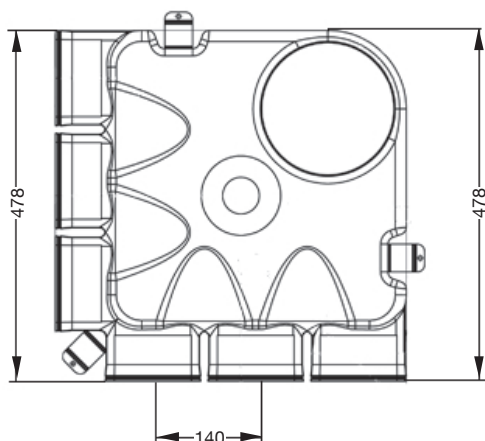

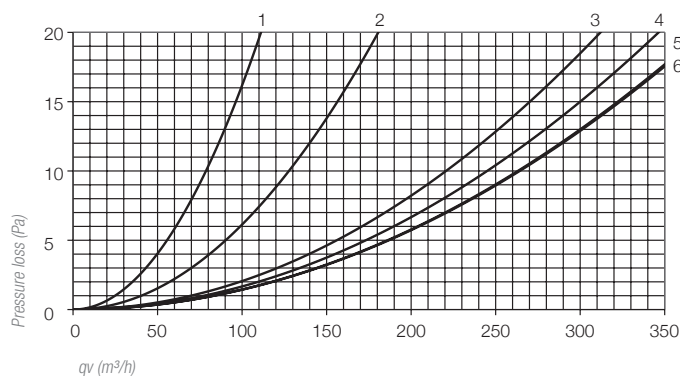

The Vasco air duct system EasyFlow, together with Vasco ventilation, assures a unique low-noise ventilation system. A limited number of parts and a smart logistical concept guarantee easy, worry-free installation. The Vasco EasyFlow air ducts are made of durable HDPE. Mounting can be done quickly, easily and flexibly. The plenum has 6 connections to which one can attach the air ducts of the EasyFlow ventilation system. These connections are delivered closed and must be opened with a box cutter. Easy to mount thanks to the 3 flexible mounting lips. If Vasco insulated air ducts are used, one must use an additional connecting sleeve: EPDM connecting sleeve Ø200-180 mm in case of insulated air duct Ø200/170mm and a galvanised reducer Ø200-180 mm in case of insulated air duct Ø255-200 mm

- Connection diameter Ø 180 mm
- Packaged by 2
- Material: HDPE (High Density Polyethylene)
- Airtightness class in accordance with NEN-EN 1507 & NEN-EN 12237: D

TECHNICAL DATA

Pressure loss plenum of the number of connected air ducts

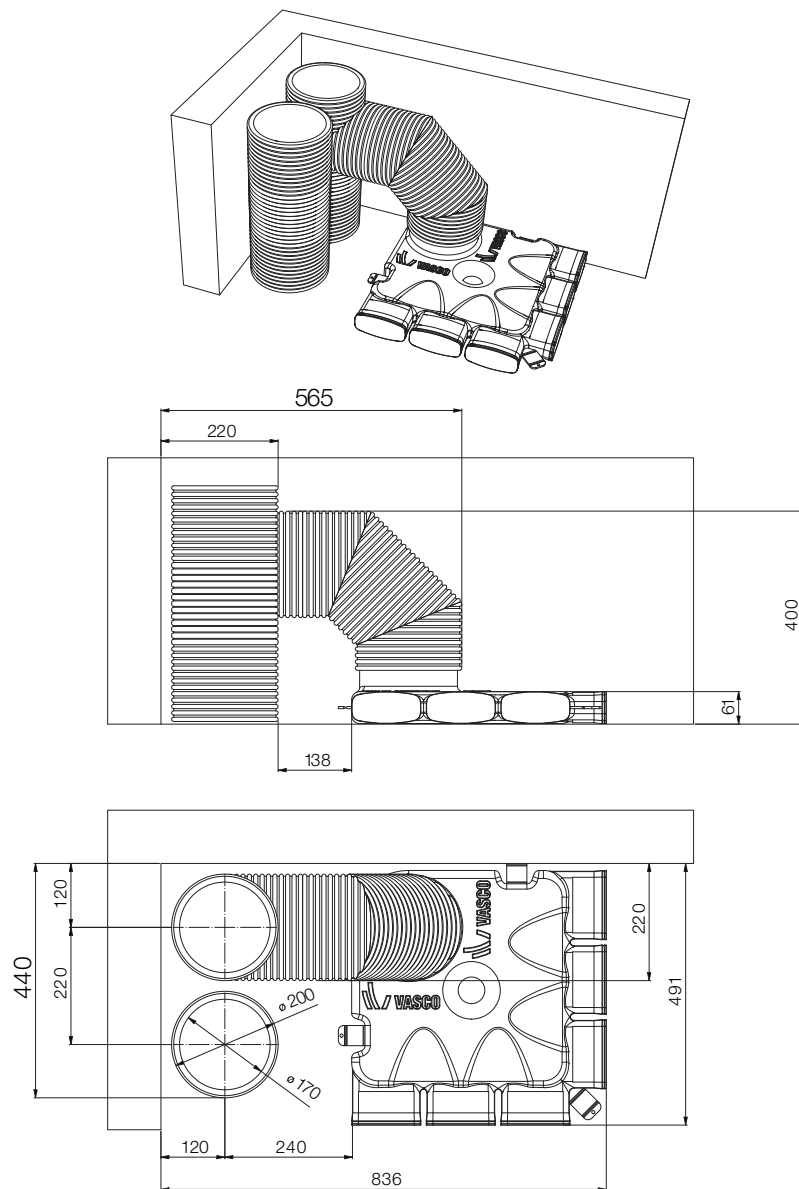

Dimensioning in mm

EASYFLOW PLENUM VERTICAL

PRACTICAL APPLICATION

Installation on a shaft

Dimensioning in mm
