

EASYFLOW TRANSITION

DESCRIPTION

The Vasco air duct system EasyFlow, together with Vasco ventilation, assures a unique low-noise ventilation system. A limited number of parts and a smart logistical concept guarantee easy, worry-free installation. The Vasco EasyFlow air ducts are made of durable HDPE. Mounting can be done quickly, easily and flexibly.

With the transition piece you can make a branching on a round duct of $\varnothing 125$ mm to the EasyFlow air duct system. The connection of $\varnothing 125$ mm is designed as tube size, thus an accessory of $\varnothing 125$ mm fits in here. The transition piece can also be directly connected to the C400RF 125 mm connection. The transition piece comes with a rubber gasket $\varnothing 125$ mm.

- Comes in a package of 2 or 5 pieces
- Material: HDPE (High Density Polyethylene)
- Includes 1 mounting bracket / transition piece
- Airtightness class in accordance with NEN-EN 1507 & NEN-EN 12237: D
