

EASYFLOW RIGHT-ANGLED VALVE CONNECTOR

DESCRIPTION

The Vasco air duct system EasyFlow, together with Vasco ventilation, assures a unique low-noise ventilation system. A limited number of parts and a smart logistical concept guarantee easy, worry-free installation. The Vasco EasyFlow air ducts are made of durable HDPE.

Mounting can be done quickly, easily and flexibly.

You can connect a supply or exhaust valve of Ø 125 mm to the right-angled valve connector.

To serve as markings, small grooves have been made every 50 mm on the cylindrical part.

Depending on the thickness of the floor structure, the valve connector can be shortened to the desired length on the basis of these markings. The valve connector is equipped with a rubber gasket.

- Comes in a package of 2 or 5 pieces
- Material: HDPE (High Density Polyethylene)
- Includes 1 mounting bracket / right-angled valve connector
- Airtightness class in accordance with NEN-EN 1507 & NEN-EN 12237: D

TECHNICAL DATA

Pressure losses through right-angled valve connector
