

EASYFLOW PLENUM HORIZONTAL

DESCRIPTION

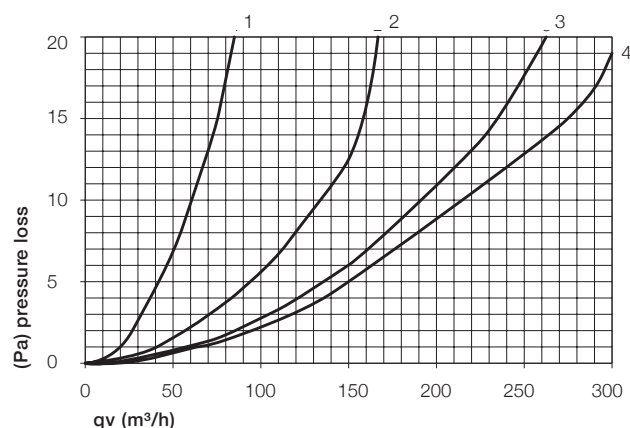

Vasco's EasyFlow air duct system, together with Vasco ventilation, assures a unique low-noise ventilation system. A limited number of parts and a smart logistical concept guarantee easy, worry-free installation. The Vasco EasyFlow air ducts are made of durable HDPE. Mounting can be done quickly, easily and flexibly. The plenum has 4 connections to which one can attach the air ducts of the EasyFlow ventilation system. These connections are delivered closed and must be opened with a box cutter. Easy to mount thanks to the 2 flexible mounting lips. If Vasco insulated air ducts are used, one must use another connecting sleeve \varnothing 200-150 mm.

- Connection diameter \varnothing 150 mm
- 2 per package
- Material: HDPE (High Density Polyethylene)
- Airtightness class according to NEN-EN 1507 & NEN-EN 12237: D

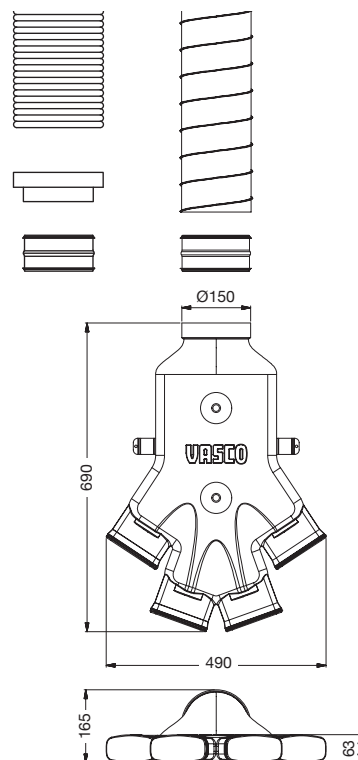

TECHNICAL DATA INSULATED

Pressure loss of horizontal plenum by the number of connected air ducts

insulated
 \varnothing 200/170
