

Easy Flow® connector piece

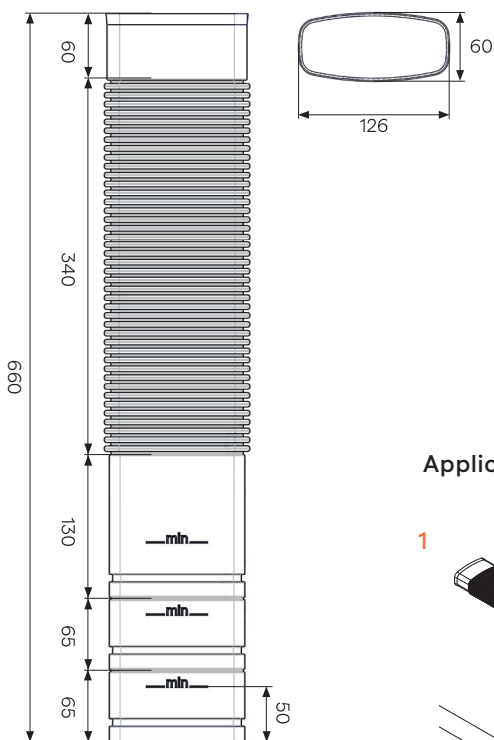

Description

Vasco's Easy Flow® air duct system, together with Vasco ventilation, assures a unique low-noise ventilation system. A limited number of parts and a smart logistical concept guarantee easy, worry-free installation. The connector piece is specifically designed for use in prefab homes, allowing air ducts running across multiple building sections to be easily connected. Like the air duct, the connector piece is equipped with a rubber seal that ensures an airtight connection. Depending on the required length, the connector piece can be shortened.

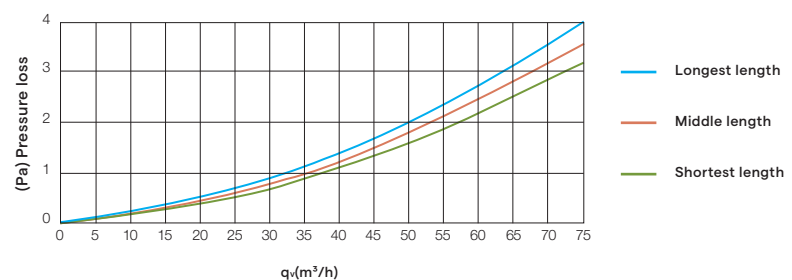

- Includes rubber seal
(when shortening the connector piece, relocate the rubber seal)
- Comes in packages of 6 pieces
- Material: HDPE (High Density Polyethylene)
- Airtightness class according to NEN-EN 1507 & NEN-EN 12237: D

Technical data

Pressure loss connector piece

Application in a prefab module
