

# Easy Flow® horizontal bend 90°

## Description

The Vasco air duct system Easy Flow®, together with Vasco ventilation, assures a unique low-noise ventilation system. A limited number of parts and a smart logistical concept guarantee easy, worry-free installation. The Vasco Easy Flow® air ducts are made of durable HDPE. Mounting can be done quickly, easily and flexibly. The 90° horizontal bend makes the Easy Flow® system even more flexible. This thanks to its small radius, and the possibility of applying it in 3 different lengths.

- Includes rubber gasket (if the bend is shortened, move the rubber gasket)
- Packaged by 3
- Material: HDPE (High Density Polyethylene)
- Includes 1 mounting bracket / horizontal bend
- Airtightness class in accordance with NEN-EN 1507 & NEN-EN 12237: D

## Technical data

Pressure loss through horizontal bend 90°, supply air

Pressure loss through horizontal bend 90°, exhaust air

## Fixation Easy Flow® with mounting bracket

It is recommended to fix the Vasco Easy Flow® air ducts and accessories by means of the supplied mounting brackets. The fixation of this mounting bracket to the surface can be done in different ways.

### Traditional fixation by pressure nail or plug and screw

To apply the Vasco pressure nails or standard plugs and screws, a hole must first be drilled of Ø 6mm. After this you can fix the mounting bracket by pushing the pressure nail into the provided hole or inserting a plug and screwing the mounting bracket.

### Alternative fixation by gas nailer

The PULSA® 27, from SPIT Paslode, offers a quick and easy way to fix mounting brackets to the substrate. This by using the steel and concrete nails of 22 or 27mm in combination with a rondel and the specific magnetic rondel holder, which can also be used on a wooden surface.

### Key features and benefits:

- Lighter and more compact: the lightest and most compact device on the market
- Ergonomic: lightweight, versatile and more agile in tight spaces or awkward positions and overhead applications
- More-capacity battery: up to 10,000 shots per charge (magazine capacity of 30 nails)
- Fast and cost-effective: up to 8x faster than traditional anchoring
- Health and safety: virtually dust-free work with less vibration
- No delay: high-quality, reliable and proven technology for more than 35 years
