

CELLAR WALL FEED-THROUGH

DESCRIPTION

The Vasco insulated air ducts and accessories, together with the other Vasco ventilation products, assure a unique low-noise ventilation system. The insulated parts were developed to meet the ever more stringent requirements for thermal insulation and noise level in living spaces that are set for air-technical installations with heat recovery. These insulated parts must be applied to the outdoor connection of the ventilation system.

The Vasco cellar wall feed-through can be used for all outdoor connections with inner diameter Ø 170 and 200mm. The cellar wall feed-through comes standard-equipped with a 400mm extension.
