

ADJUSTABLE COUNTER FLASHING

DESCRIPTION

The Vasco insulated air ducts and accessories, together with the other Vasco ventilation products, assure a unique low-noise ventilation system. The insulated parts were developed to meet the ever more stringent requirements for thermal insulation and noise level in living spaces that are set for air-technical installations with heat recovery. These insulated parts must be applied to the outdoor connection of the ventilation system.

The Vasco adjustable counter flashing must be used when installing a roof feed-through on a pitched roof. The counter flashing is delivered without hinge cover, which therefore must be provided for separately.

TECHNICAL DATA

Colour	Black
Adjustable slope	25° to 45°
Suitable for air duct	Ø160/125 mm
