

VASCO CLIMATE CONTROL WHEREVER YOU ARE

Control your indoor climate using the handy Vasco Climate Control app.

Using Vasco's intuitive Climate Control app, you can fully control your indoor climate wherever you are. The technology is cloud-based so that you can always log in from anywhere to check or to adjust your indoor climate.

THE OPTIMAL INDOOR CLIMATE IN JUST 3 STEPS

- 1 DOWNLOAD THE FREE VASCO CLIMATE CONTROL APP
- 2 LOG IN AND PROGRAM YOUR PERSONAL SETTINGS
- 3 CONNECT TO YOUR VASCO-GATEWAY AND CREATE YOUR IDEAL INDOOR CLIMATE

VASCO-APP CLIMATE CONTROL CAN BE DOWNLOADED FOR IOS AND ANDROID FREE OF CHARGE.

The new Climate Control system of Vasco lets you enter a world of unrivalled user comfort. From now on, your radiators, ventilation and underfloor heating will be connected to the Internet via a single interface. Thanks to the user-friendly app, you can always log in from anywhere for setting your optimal indoor comfort: room by room. Wherever you are! Connecting is child's play, but your comfort makes a quantum leap!

CLIMATE CONTROL

FULL CONTROL OF YOUR INDOOR CLIMATE WITH

RADIATORS, VENTILATION & UNDERFLOOR HEATING

CREATE THE IDEAL INDOOR CLIMATE USING VASCO CLIMATE CONTROL

COMBINE RADIATORS, VENTILATION & UNDERFLOOR HEATING

- More comfort, less energy
- User-friendly
- Easy installation
- Smart climate zone control (in each room separately)
- Temperature control for radiators, ventilation and underfloor heating
- 4 standard scenarios: wake up, away, at home and sleep
- Programmable daily schedule and life style
- Wireless connection to the internet

WEATHER AND HISTORY

Vasco Climate Control takes the weather conditions, previous measurements and settings into account.

HOLIDAY

Going on holiday? Just set this via the Vasco app. The cloud-driven intelligent control does the rest.

DAILY SCHEDULES

Do you want to deviate from your daily schedule? Just change the temperature per room and per life style.

MORE COMFORT LESS ENERGY USING VASCO CLIMATE CONTROL

Using Vasco Climate Control, you trim your energy invoice by controlling radiators, ventilation and underfloor heating as efficiently as possible.

Vasco Climate Control not only takes the weather conditions into account, but also the previous measurements and settings. The system contains 4 standard scenarios (wake up, away, at home, sleep) that you can adjust as desired and you can add scenarios as well. The result is a customised comfortable and energy-efficient indoor climate for your family! Suitable for new and existing installations, even for most of the non-Vasco products that are installed.

RADIATORS

VENTILATION

UNDERFLOOR HEATING

VASCO GATEWAY

What do you need? Not much! Using the Vasco Gateway, you connect wireless to the Internet. You build the rest of the installation as desired using various components and modules.

EFFICIENT CLIMATE CONTROL FOR

RADIATORS

are controlled using the RF digital thermostat buttons.

VENTILATION

is supported by wireless RF switches.

UNDERFLOOR HEATING

is controlled using the underfloor heating control with zone management.

Do you have to combine everything? Definitely not!

Vasco Climate Control can connect the product groups (radiators, ventilation and underfloor heating) to each other, but it operates with each separate product group as well. This way, you can attune only the radiators, for example, to the desired life style of your family.

SMART ZONE CONTROL

Thanks to Vasco Climate Control, you never overheat your home, but exactly enough for optimal indoor comfort. Using the digital RF thermostat buttons, you demarcate up to 3 different heating zones quickly and easily. You have 5 standard heating zones for underfloor heating that you can expand to maximum 8 zones by means of an additional module (Vasco zone control and thermostats). This way, you control the climate in each room separately and you never waste energy.

STARTER'S PACKAGE

Using the Climate Control Starter's Package, you create your ideal indoor climate in a trice. You can order this package via your Vasco installer.

- Standard this package contains:**
- 1 Vasco Gateway
 - 3 digital RF thermostat buttons for radiators

This package can always be expanded with additional components afterwards.

The desired indoor climate custom made for the life style of your family:

This is merely an example. You can easily create your own daily schedule
