Electric heating is a hot topic. Year on year, the demand from installers and consumers for innovative electric heating solutions continues to rise. As insulating PV panels in our home continue to improve, electric heating provides an alternative cost-efficient and user-friendly solution. Electric heating works on the plug-and-play principle, i.e. without the invasive need for drilling, channeling or maintenance work. These solutions also respect Vasco’s time-honoured tradition of paying the utmost attention to efficiency, design and ease of use.

PURITY OF DESIGN, NOW ALSO ELECTRIC

This new aluminium designer radiator combines all the benefits of electric heating with purity of design - a real must-have for those who love a minimalist look! During the development process of the Beams Mono-EL, the Vasco designers had to pull out all the stops to be able to integrate an electrical resistance in the sleek vertical profiles (width 150 mm). The profiles were fitted with additional fins to increase the heat output. There’s also a cover panel at the back, in the same colour as the front, which houses the electrical resistance. As a result, the radiator can be maximum heated - obviously with the option of automatically regulating the surface temperature according to your needs.

In conformity with EN442-1: 2014: radiators and convectors

BEMS MONO-EL

**HOW TO ORDER BEAMS MONO-EL**

Delivery time 15 - 30 working days

Stock radiator: Delivery time 5 working days

(transport duration not included)

**PRODUCT GROUP: ELECTRICAL**

**REGULATION (RF THERMOSTAT)**

INCLUDED IN THE PRICE

- Operating voltage of the RF receiver: 230V AC, 50 Hz
- RF thermostat: 2x Alkaline 1.5V
- Weekly and daily programming

**UK. Prices 09/2019 (excl. VAT)**

REGULATION (RF THERMOSTAT) INCLUDED IN THE PRICE

- Control of room temperature from 7°C to 30°C
- Control of surface temperature from 20°C to 80°C
- Boost command: standard 60 minutes
- Auto, Comfort, Eco or frost protection mode
- Set programmes P1, P2 and P3 can be changed
- RF receiver: IPX4 Class II
- Thermostat: IP30
- Cable length: 0.8 m (preferably use a direct fixed wall outlet)
- Energy-consumption indication
- Indicator of open window detection
- RF communication between the receiver and the thermostat (to be connected)

**BEAMS MONO-EL ACCESSORIES**

IN OPTION (see technical price list)

- Short towel rail
- Rectangular towel rail
- Square towel rail
